

## Directions for Playing the Spring 2017 Training Modules on a Mac

**Date:** February 3, 2016

**Description:**

After downloading the module file, you may be notified that the file is damaged and should be moved to the trash. This occurs if your computer is set to only allow App downloads to come from the Mac App Store. To allow your Mac to display the module, follow these steps.

1. Click on System Preferences
2. In the top row, click on Security and Privacy
3. Under “Allow apps downloaded from:” click the radial button next to ‘Anywhere.’ (Note that you will likely need an admin account to do this.)
4. After you have completed the module, make sure to set this back to whatever setting it was at previously to maintain security.
